The Impact of Federal Health Care Reform on Health Plan Costs*

Federal health care reform may change health plan benefits and costs. **After January 1, 2014**, health insurers and HMOs:

- Must offer new benefits.
- Must cover everyone even if they have preexisting medical conditions.
- Must pay new taxes and fees which add to health plan costs.
- Must charge same health plan costs to men and women.
- Must limit how much your age can affect health plan costs.

Below is an **example** using one of our company's most popular plans and the cost of a new plan showing the impact of federal health care reform. This is an example only and it does not show differences in co-payments and deductibles. Your health plan costs may not change in the same way. Your health plan costs may be reduced if you qualify for federal tax credits or subsidies.

This example compares the health plan monthly cost for FL MC OA 12-10K-100S before federal health care reform to the health plan monthly cost for the new FL Gold OAMC 1000 80/50 health plan offered after health care reform.
