

2018 Safe Harbor Guidelines for HIV/AIDS Drugs

PPACA Guidance to Insurers:

At least one form of each drug must be offered if no specific dosage is listed below. Any additional anti-retroviral medications beyond those listed should be tiered according to cost, and not according to the medical diagnosis or condition being treated. Preauthorization should not be required except in cases of suspected fraud. Drug quantities should never be limited to less than a thirty (30) day supply and any refills authorized by the treating physician. Step therapy should not be required for the administration of any of these drugs.

Compliance with the safe harbor guidelines is not mandatory. However, the Office is prohibited from certifying a plan to be included on the Federal Health Insurance Marketplace if the Office knows that the plan employs a drug formulary discriminatory in benefit design, benefit implementation or medical management techniques. Additionally, the Office will disapprove any plan it finds violates Sections 627.429, 641.3007, or 641.31(3)(c)6., Florida Statutes.
